Introduction

This exam will qualify you to become a RedHat Certified System Administrator.

Designed for IT professionals working to become full-time enterprise Linux system administrators. The course is a follow-up to CompTIA Linux+ and continues to utilize today's best-of-breed, contemporary teaching methodology. Students will be actively engaged in task-focused activities, lab-based knowledge checks, and facilitative discussions to ensure maximum skills transfer and retention. Building on the foundation of command line skills covered in CompTIA Linux+(LX-101), students will dive deeper into Red Hat Enterprise Linux to broaden their "tool kits" of administration skills.

By the end of this Module, students will be able to administer and troubleshoot file systems and partitioning, logical volume management, access control, package management. Students who attend Redhat Administration will be fully prepared to take the Red Hat Certified System Administration (RHCSA) exam.
